

14 SEP 1951
10 SEP 1951

1. The first part of the report is devoted to a description of the experimental apparatus and the method of measurement.

2. The second part of the report is devoted to a description of the results of the measurements and to a discussion of the factors which influence the results.

3. The third part of the report is devoted to a description of the theoretical considerations which are necessary for the interpretation of the results.

4. The fourth part of the report is devoted to a description of the conclusions which can be drawn from the results of the measurements and the theoretical considerations.

5. The fifth part of the report is devoted to a description of the experimental conditions which are necessary for the reproduction of the results.

6. The sixth part of the report is devoted to a description of the experimental conditions which are necessary for the reproduction of the results.

7. The seventh part of the report is devoted to a description of the experimental conditions which are necessary for the reproduction of the results.

8. The eighth part of the report is devoted to a description of the experimental conditions which are necessary for the reproduction of the results.

9. The ninth part of the report is devoted to a description of the experimental conditions which are necessary for the reproduction of the results.

10. The tenth part of the report is devoted to a description of the experimental conditions which are necessary for the reproduction of the results.
